

**Dr. Kristie L. Ebi** has been conducting research on the impacts of and adaptation to climate change for more than a dozen years, including on extreme events, thermal stress, foodborne safety and security, and vectorborne diseases. She was an independent consultant prior to joining the TSU. She has worked with the World Health Organization, United Nations Development Programme, International Development Research Centre, USAID, and others on designing and implementing adaptation measures in low-income countries. She facilitated adaptation assessments for the health sector for the U.S. states of Maryland and Alaska. She was a lead author on the “Human Health” chapter of the IPCC Fourth Assessment Report, as well as chapters in the Millennium Ecosystem Assessment and the International Assessment of Agricultural Science and Technology for Development. She has edited four books on aspects of climate change impacts and adaptation, and has more than 80 publications. Dr. Ebi’s scientific training includes an M.S. in toxicology and a Ph.D. and a Masters of Public Health in epidemiology, and two years of postgraduate research at the London School of Hygiene and Tropical Medicine.
